Order now free Sunday school lessons Answers in Genesis Details March 1, 2016 in 2009, Ken Hamm and Britt Beamer wrote the book Gone, based on research, revealing that the majority of young people raised in the church often leave the church because they do not accept the authority of Scripture and its message. Part of the problem is that many parents rely on an hour in Sunday school to provide a spiritual foundation for their children by not doing at home to support Sunday school efforts. Another factor is the curriculum used in many Sunday schools. Some programs teach Biblical stories, but in such a way that they come across only as stories. Very few Bible programs for younger classes even try to deal with difficult questions and challenges faced by children. While some upper-level programs address difficult questions, few do so based on a fundamentalist point of view that insists on literally reading the book of Genesis. Answers The Bible Curriculum (ABC) was developed to try to address these issues. The ABC is built on several basic principles. Some of these are: • God's Word is true; God doesn't lie. • The historical the Bible are often confirmed by historical, archaeological and scientific support. Support. • The Bible presents a true story, • Many accounts in the Old Testament connect with the New Testament and point to Jesus and the message of the gospel. 2) A brief summary of abc's hallmarks may be that it highlights the importance and accuracy of the book of Genesis, including the perspective of the young earth. It also has a stronger apologetics aroma than many other programs do. Realizing the importance of the whole family learning and discussing together, the Absvive abscis leads students by studying basic Biblical principles in three-year cycles using the entire Bible of Genesis through Revelation (though it does not cover each book). Courses are presented for seven different age levels from preschool to adults, so each family member must cover the same topic at the same time at an appropriate level. Most levels are targeted at two class levels, although high school and adult levels apparently have more than three years. (You can go through junior grade level for grades 7-9 then use the high level for grades 10-12.) The same set of posters is used for class 1-6 and a similar set is used for junior levels of adult learning. It seems to me that after completing the first three-year cycle with children in primary classes, you can go through them through the next cycle for another three years by repeating the themes. However, older children and adults may not welcome this kind of repetition. But you don't have to worry about this issue for at least three years, and maybe the ABC will expand the program to that time. The program is intended for use in the Sunday school classroom. The Full Teacher set comes in a box for each level and can be purchased for a quarter of the year at once or for the whole year (full year, not just school year). Each set of teachers includes one set of home sheets, which can be used by a home school with only one student. However, additional sets of home sheets are available. The cost of this agreement makes more sense for tuition groups than for students at school, as it ends over \$130 a year for one level per student, while all additional students at the same level are only \$4.99 each. In most situations, you may need to stretch to levels so that they can be children older or younger than the target class levels, so you may not need more than one or two levels. I received the first quarter to review grade 3-4, so the rest of my comments are based on this set. The complete teacher set includes an individual, 12-page teacher manual for each of thirteen lessons plus an introductory brochure. guides are very well exposed. The first page lists key topics, key scripture passages, goals, and content schematic. The second page has a table showing what you will do and what you will need plus the memory verse for the week. The next few pages provide the teacher with Bible, apologetics, and historical information, as well as prayer. Additional background information is sometimes available in the free online resources on the ABC website. The remaining pages in each of them in your teacher manual end the lesson step by step as students study the scriptures and study practical applications. The lessons are very interactive with a lot of discussion that the teacher leads. Two of the thirteen lessons review the last six or seven lessons, mostly through games and interaction. Lessons are signed with suggested answers, which we follow immediately. The script also directs the teacher to use posters and worksheets for students with clear guidance at every step of the way. Worksheets are printed from a DVD-ROM that comes with teacher manuals. DVD-ROM includes PDF pages for students (worksheets, puzzles, games and scyth scripts) that are used during class, as well as maps, teaching mini-posters and printing manipulative materials, images, videos (for grades 5-6 and above), as well as other learning resources to use. Some of the learning resources must be printed on a fund card and cut in advance. Four pages, full-color household sheets reinforce lessons and help students work on the weekly memory verse. While students can complete most of this on their own, at least one section requires a family discussion. Full-color posters are used throughout the program; they are not just decoration of the walls. Teachers often refer to posters as they teach each lesson. Six posters are 17" x 22". A set of 11 smaller 8.5 x 11 posters is used alongside larger posters. All of them do not need to be at the same time, but you will need space to mount posters for your tutorials, at least temporarily. It takes time to prepare lessons; This is not a pickup and movement program. However, detailed lesson plans make it easier for an inexperienced teacher or parent to present the lessons. The format of lessons is likely to work well in Sunday classes, but it can be problematic for school students. Scythies and games take on a group of children for interaction. Few families to teach children have enough children close in age and ability to use the full lessons as written. Most people who are at home will have to adapt the activities for use with one or more children, and this will not always be practical. Even if the ABC isn't the most practical curriculum for studying subjects in classes, it seems like a great opportunity for group classes, regardless of whether they're in the classroom. these are groups of school co-ops or more traditional Sunday school conditions. When prices appear, please note that they are subject to change.
